Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 6,216,789 to Lorsignol et al.

Lorsignol et al disclose, among other things, a load movement control system for a winch or crane system located on a vessel, the winch or crane system including a lift wire, the load movement control system comprising: a control means 51 to permit an operator to instruct the winch or crane system to at least raise, hold or lower the lift wire; a vessel motion detection means 47 for detecting heave acting upon the vessel and winch or crane system; lift wire resonance prevention means 52 for measuring and/or predicting the tension in the lift wire; and a control device 56.
